New Delhi, India 110045 | 7827453374 | Sumitkrdocs@gmail.com

SUMMARY

Aspiring penetration tester with a strong foundation in both GRC and technical cybersecurity domains. Actively engaged in hands-on practice using industry tools through virtual labs and real-world simulations. Continuously building skills through structured coursework while staying involved in cybersecurity communities to remain updated with evolving threats and techniques.

EXPERIENCE

- Current

Penetration Tester

- Completed IBM Cybersecurity Professional Certificate coursework with practical labs to build foundational knowledge
- Practiced cybersecurity tools and technologies in virtual labs to enhance technical skills

EDUCATION

2026

Bachelor of Computer Applications

Indira Gandhi National Open University

CERTIFICATIONS

IBM Cybersecurity Professional Certificate

Hands-on training in network security, Penetration testing, encryption, digital forensics, and incident response etc.

PRACTICAL PROJECTS

Penetration Testing Labs: Designed and deployed virtual lab environments using Kali Linux and vulnerable machines performed hands-on exploitation, privilege escalation, and post-exploitation techniques.

Web Application Security(OWASP TOP10): Identified and exploited vulnerabilities including SQL Injection, XSS, IDOR, and file inclusion; validated fixes and documented remediation steps.

Network Security & Enumeration: Conducted network scanning and enumeration using Nmap and Netcat identified attack surfaces and misconfigurations.

Endpoint Security & Hardening: Implemented system hardening on Windows and Linux systems, including firewall configuration, user privilege management, and endpoint detection tools.
